The Iron Yard
2017 Front-End Engineering Certification

SUMMARY

I am a value-driven tech entrepreneur who is relentless in the pursuit of creative problem solving and overcoming obstacles as a team. I love to collaborating on a open minded team to improve overall user interaction and experience. I enjoy using the latest JavaScript based technologies such as React, Redux, and GraphQL. I am a very adaptive developer who can rapidly learn to complete objectives with passion, and enthusiasm.

Another huge advantage of having me on your team is that I can also double as a UI/UX Designer who can rapidly design, and prototype using technologies such as Sketch, and InVision Studio.
