## PORTFOLIO

Website

Github

## PROJECTS

### CruzComms

- A web app written in JavaScript and designed to turn any cruise ship into a mobile intranet!
- Used for the purposes of communication between passengers.
- Cruise ships using this service will give a significantly smaller portion of their data to passengers and save money.
- Text message, video chat, maps.

### Eco-Hostel API

- An API written in .NET to provide data sustenance to the frontend at [eco-hostel.satoftegaard.surge.sh](http://eco-hostel.satoftegaard.surge.sh).
- Utilizes a SQL database created with code-first techniques.
- Manipulates and analyzes data using LINQ statements and Entity Framework. Hosted using Azure.

### RestaurantDemo

- A simple demonstration for the functionality of an "online restaurant".
- Code-first API and database created with ADO.NET.
- Front-end utilizes ASP.NET Razor syntax to create HTML with data-binding functionality.

## EXPERIENCE

### Mad Mobile/Tampa, FL

**March 2017 - October 2017**

#### Web Developer

- Efficient, maintainable, and scalable HTML/ CSS within Node.js and React based projects
- Implemented a skin system to create customized layouts for individual sites that were built off a single code base

## EDUCATION

The Iron Yard, Tampa/St. Petersburg, FL

Backend Certification

November 2016 - February 2017

- 3-month course specifically focused on C# and the .NET stack
- Designed to teach students to think like a programmer
