PORTFOLIO & GITHUB:

[Website](#)

[GitHub](#)

PROJECTS:

Neighborhood Map — <https://project.com>

Utilized Knockout.JS and Bootstrap to create a single page web application that uses Google Maps & Yelp APIs to provide additional functionality and information on 20 restaurants within the neighborhood.

Recipes Box — <https://project.com>

A simple web app using React.JS to add, delete, and edit recipes. Recipes are saved in local storage. SASS, styled-components, and bootstrap were utilized for different approaches to styling the app.

Leaderboard — <https://rproject.com>

A leaderboard app displaying the top 100 Free Code Camp users by recent top points and all-time top points with React.JS. Users can sort by recent or all-time top points. SASS, bootstrap, react-icons, & FreeCodeCamp's API.

Contact Manager — <http://project.com>

A simple app allowing users to add & delete contacts: name, email, and phone. Utilized React, Flux, & bootstrap.
